

# PCMH Virtual Learning Course

## PCMH 2017

This learning course is a deep dive through all PCMH criteria including meaningful implementation. Training will take place over a course of 3 days for 3.5 hours each day.

## Shannon Nielson

PCMH-CCE Principal Consultant with over 16 years experience with FQHCs. Shannon is regularly sought after as a leading expert in PCMH Recognition, Population Health Management and Health Center Operations.

## E-Learning

Training will be held October 28, 29, and 30 via Zoom. Registration is required. Three packages are available, see additional information for cost.

Our most popular training workshop, held by us, for all to attend.

# Why the CURIS PCMH Training?

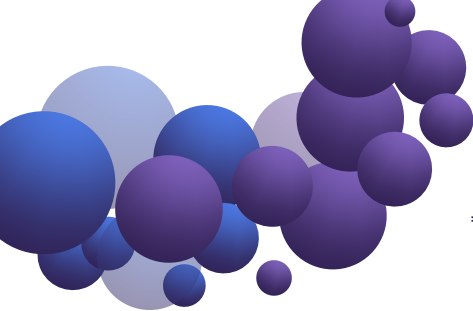

This virtual training takes a unique approach in guiding you through PCMH compliance and PCMH practice. We do not believe in simply “passing” to become certified as a Patient Center Medical Home. We know how important it is that your patients and your organization experience a return on the investment it takes to receive this recognition.

Having successfully assisted over 200 health centers and practices achieve recognition, practice and sustain PCMH principles, CURIS knows how to use your existing health center infrastructure to maximize the value of being a PCMH. The CURIS training includes:

- COVID-19 impact on PCMH- using the pandemic to your advantage to practice PCMH criteria
- Using your HRSA, FTCA, HEDIS, UDS, ACO and other infrastructure to meaningfully be a PCMH
- Deep dive into being compliant and practicing critical and difficult criteria throughout the PCMH framework
- Real life examples for each criteria

**Client Feedback:** “For me, it was a breeze to do this virtual training. You guys did all of the work, I just had to get the people to attend and register. The technology worked out well and people felt the length of time each day was great. I was very satisfied with how good it went and how easy it was for me. Thank you again for a great training. Shannon rocked as she always does.”
