

NEW Care Coordination Service Line

Assisting healthcare organizations with Care Coordination activities.

CURIS Connect offers services related to the often-challenging activities associated with Transitions of Care, Order Tracking & Follow Up, Referral Management, and Prior Authorizations, and more!

We leverage targeted patient outreach to improve patient experience and reduce risk related to Social Determinants of Health (SDOH) and gaps in care. Our team recognizes that these services are essential in maintaining compliance and adherence to best practices for regulatory requirements such as FTCA and Patient Centered Medical Home, and to succeed in the Value Based Care environment. As drivers of success with Quintuple Aim, the CURIS Connect team brings timeliness, efficiency, and effectiveness to improving quality and experience, managing costs, optimizing care team resources, and promoting health equity.

CURIS Connect services are tailored to meet the needs of your organization. Our client partners may select one, multiple, or all of our services. Each client will receive an overview assessment to help identify the unique needs of the organization and to ensure workflow is designed to enhance your internal processes and align with your goals and priorities. All clients will receive documentation of policies and procedures reflecting duties, responsibilities, and workflow of the CURIS Connect team members allocated to the organization, along with performance tracking and reporting to demonstrate the value of the services delivered.

Grant Funding:

Did you know the CURIS Connect services are in line with the most recent UDS Grant funding? We can assist you in ensuring our scope of work aligns with your UDS Grant funding guidelines and budget. ([UDS Patient-Level Submission Funding Information](#))
