

Happy November!

2022 has been a great year for us at CURIS and we hope it has been for all of you as well. In our continued commitment to providing the very best service possible, we have forged new collaborations, launched new services, and tripled our staff.

As the end of the year approaches, we know Health Centers often find themselves focusing on properly staffing for the holidays, end of year financials, COVID/Flu shot awareness, and more. So, we thought we would help with providing a list of tips to prepare you for the new year.

UDS- That time of the year is upon us! Annual Reporting is due February 15th. Have you considered using the UDS Preliminary Reporting Environment (PRE) to test your data submission processes?

- You can find instructions for accessing the PRE and the reporting tools in the [Accessing UDS Reporting Guidance](#) and the [EHB Help and Knowledge Base](#)
- The [UDS Submission Checklist](#) can provide helpful guidance as you prepare!

Workforce: We know that workforce constraints continue to pose significant challenges throughout your health centers! This creates a difficult burden on patients, providers, and administrative staff. As you focus on addressing vacancies - we encourage thinking "outside the box" and considering new and innovative strategies such as interim roles and outsourced remote staffing. *(*Read below on how our CURIS Connect team can help!)*

PCMH: Whether you are ready to take that first step into the journey of becoming recognized, or you are preparing for annual reporting, the earlier you start the process the better.

Call Center Improvement: Challenges with managing call volume can lead to widespread communication issues. Improving call center efficiencies, creating action plans to improve patient experience, staff retention, optimizing technology, tools and resources, etc.

Program Development: Are you looking to develop new programs in your health centers? Access, Outreach, Care Coordination? Focusing on these programs ensures a better patient experience.

Not sure where to start? Not quite sure what you need? We are here to help! We provide free 1 hour consultations to help you plan out where to start and the steps needed to create an actionable plan. Just contact us at: info@curis-consulting.com, to set up a call.

We hope everyone is staying healthy and we are looking forward to hearing from you!

The CURIS Team

Our staff keeps growing!

Exciting news...we've grown! Since the launch of our newest set of services (CURIS Connect) in July 2022, our team has tripled in size... and is still growing! Our Connect team is full of Care Coordinators, Outreach, Patient Services, and other support staff to assist your health center with essential, but often often challenging activities essential to patient-centered and team based care delivery. We also have data support staff who focus on assisting with the work of data abstraction (related to EHR conversations and other technology data migration projects).

Our Connect team works remotely with Health Centers all over the nation. We are very excited to bring these services to you, and to help impact the experience and outcomes of the patients you serve!
