

FQHC experts who work with you.

Curis consultants provide the expertise needed to help create, clinical, operational and financial excellence. At CURIS we are EMR and HIT/HIS vendor agnostic as we guide clients through operational and clinical transformations.

Our consultants have firsthand experience working in health centers before transitioning into their roles as external advisors. They understand every aspect of a health center, from front desk operations and patient care to executive leadership. Acting as an extension of your team, we provide expert guidance to help you achieve success.

Not sure what you need? That's okay! We offer **free** assessment calls with your Health Center and decide on the best strategy for where we should begin, while fitting into your budget and resource needs, all while using a customized timeline.
